OVERVIEW

This document will help you install and set up the "Smart Cart Reminder" module.

The smart cart reminder solution for your PrestaShop store.

This document will guide you through the installation and how to use the module.

II INSTALLATION GUIDE

The installation process is the same as version 1.5.X of PrestaShop.

The screen images used in this manual are from the 1.6.X version of PrestaShop.

1 SYSTEM REQUIREMENTS

- You must have PrestaShop version 1.5 or higher
- You have the Smart Cart Reminder module

2 INSTALLATION

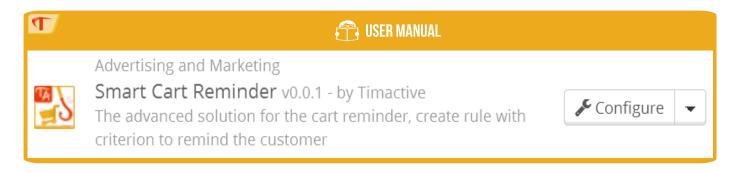

- 1. You have to go into the PrestaShop Back Office(administration) http://www.yourshop.com/admin***
- 2. Click on the 'Modules' tab:

3. Choose "Add a new module" and click on the "Choose a file" button:

 $\frac{http://doc.prestashop.com/display/PS16/Modules+and+Themes+Catalog\#ModulesandThemesCatalog#ModulesandThemesCatalog#Modulesa$

PAGE: 5/59

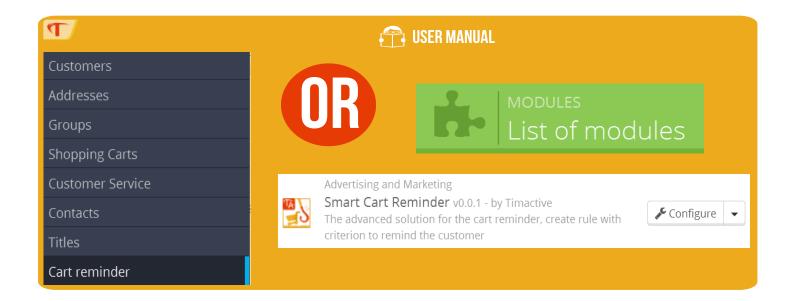

Once uploaded, the module will appear in the "Advertising and Marketing" tab

4. Click on the "Install" button.

The module has now been successfully installed

3 ACCESS THE MODULE

There are two ways to access the module:

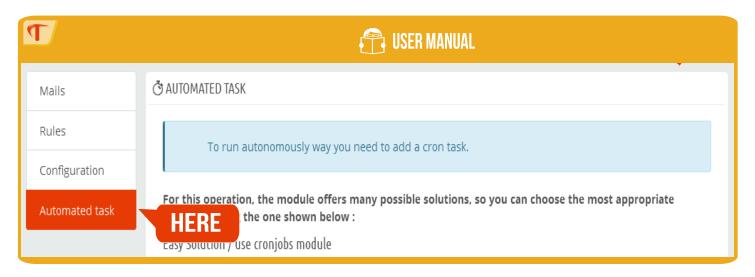

- (Quick) Customer → Cart reminder
- Modules → Advertising and Marketing → Smart cart reminder → Click on the "Configure" button

PAGE: 6/59

4 SETTING UP THE CRON JOB

This step is required to automate the processes. There are several solutions available to you. To perform this operation, go to the module's "Settings" → Automated task tab.

A OUICK AND EASY SOLUTION: USE "CRONJOBS" MODULE

Requirements: The "cronjobs" module must be installed.

The "cronjobs" module is an existing default module in your PrestaShop store, the "smart cart reminder" module automatically adds the necessary information from the "cronjobs" module if installed. **So no operation is necessary.**

B ADVANCED SOLUTION: EDIT THE SERVER CRONTAB

Edit the crontab of your server and add the lines shown in the "Automatic task \rightarrow Advanced solution" section of the module. Your host can also perform this setting.

Eg:

*/15 * * * * curl "http://www.yourshop.com/modules/tacartreminder/cron.php?token=20CX1P78L6"

In this example, the module will check for reminders to perform every 15 minutes.

The benefit of this solution is that you can configure more precise, less frequent schedules.

C MANUAL SOLUTION: BROWSER URL

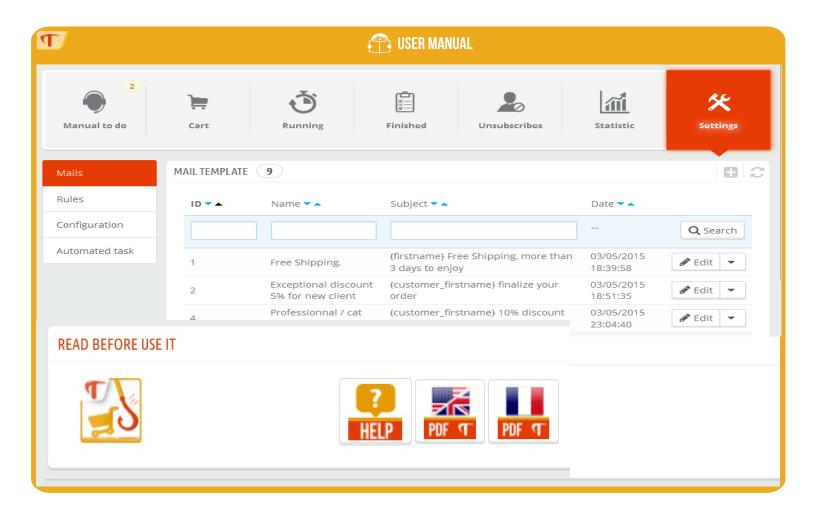

Choose this option if you want to execute processes in a timelier manner, for example for your tests.

PAGE: 7/59

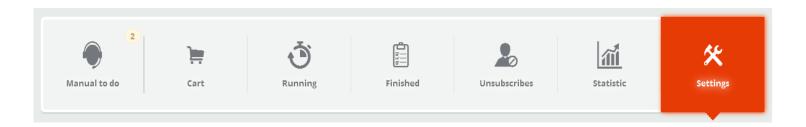

III USER GUIDE

1 OVERVIEW OF THE MODULE

This section presents the module's graphical user interfaces to help navigation. The following chapters provide a detailed presentation for each screen.

A MAIN MENU

<u>"Cart"</u>: Interact / view a list of abandoned carts not yet reminded.

PAGE: 8/59

"Running": Interact / view the list of carts containing one or more reminders that are not yet executed.

"Finished": View a list of completed or cancelled cart reminders.

"Unsubscribed": View a list of unsubscribed customers (unsubscribed from reminders).

<u>"Statistics"</u>: Access all of the module's statistics (Conversion, Email, Rules)

<u>"Settings"</u>: Access the module's settings (Edit /create cart reminder rule, email templates, etc.)

B "HELP" BUTTON

A "HELP" button appears during navigation whenever there is specific help for that particular window. i

Tip: Quickly access dedicated help without having to open the the module's full documentation.

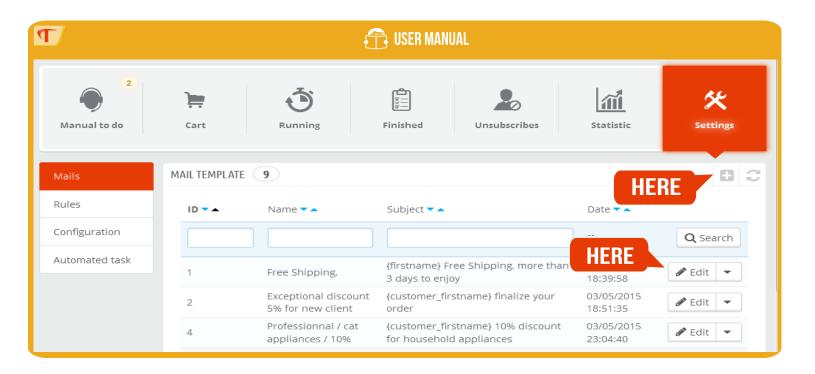

PAGE: 9/59

2 SETTINGS/EMAILS

The configuration window for editing and creating email templates. The mail template can be linked to one or more cart reminder rules.

A EMAIL TEMPLATES LIST WINDOW

Features: Edit or delete an existing email template, or create a new template.

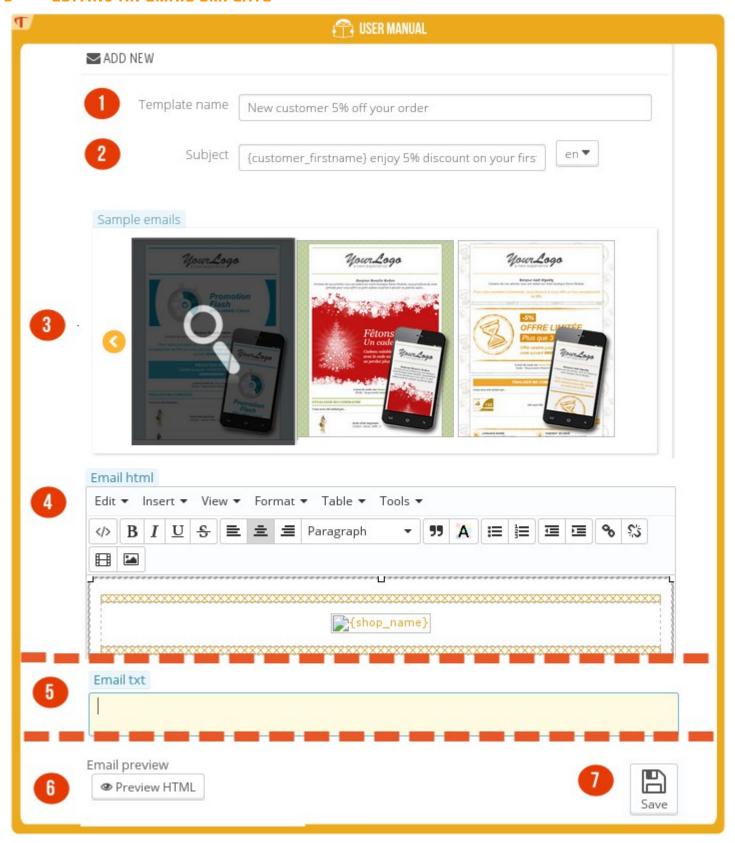

Add a new email template

Edit or delete an existing email template

PAGE: 10/59

B EDITING AN EMAIL EMPLATE

PAGE: 11/59

Legend Description

Template name, for information purposes only, it should be unique in order to be easily found.

Email subject line seen by the customer.
The following variables can be included:

{customer_firstname} Customer firstname

{customer_lastname} Customer lastname

Example: {customer_firstname} get free shipping on your order

Sample emails. The module includes various sample emails for inspiration when creating your own email.

Select a sample and customize it.

Email HTML, the content of the email that will be sent to the customer, you can customize it according to your needs.

The following variables can be included:

{customer_firstname} Customer firstname

{customer_lastname} Customer lastname

{cart_products} Cart contents in html format (with image, prices,

promo)

{cart_products_txt} Cart contents in text format

{shop_link_start} {shop_link_end} Link to your shop.

Example: Click

{shop_link_start}here{shop_link_end} to go to our

shop.

{shop_link_url} Your store's URL.

PAGE: 12/59

Example: Click here to go to our shop {cart_link_start} {cart_link_end} Link to your shop to complete the order Example: Click {cart_link_start}here{cart_link_end} to complete the order URL to complete the order. {cart_url} Example: Click here }to complete your order. {unscribe_link_start} {unscribe_link_end} Link to unsubscribe from cart reminders. Example: Click {unscribe_link_start}here{unscribe_link_end} to receive no further reminders URL to unsubscribe from cart reminders. {unscribe url} {coupon_code} Coupon discount code (only if the rule generates a coupon)

{voucher_expirate_date} (coupon expiry date Romain?)

Although the email text format is less common, it is useful to create an email in text format in order to be fully compatible with all email software. If your customer's email software cannot read HTML format, he/she will be able to view the email in this format.

Coupon expiry date

Ability to include variables: Same as HTML.

Tip: When using the HTML \rightarrow TEXT automatic conversion, some minor proofreading will be required.

PAGE: 13/59

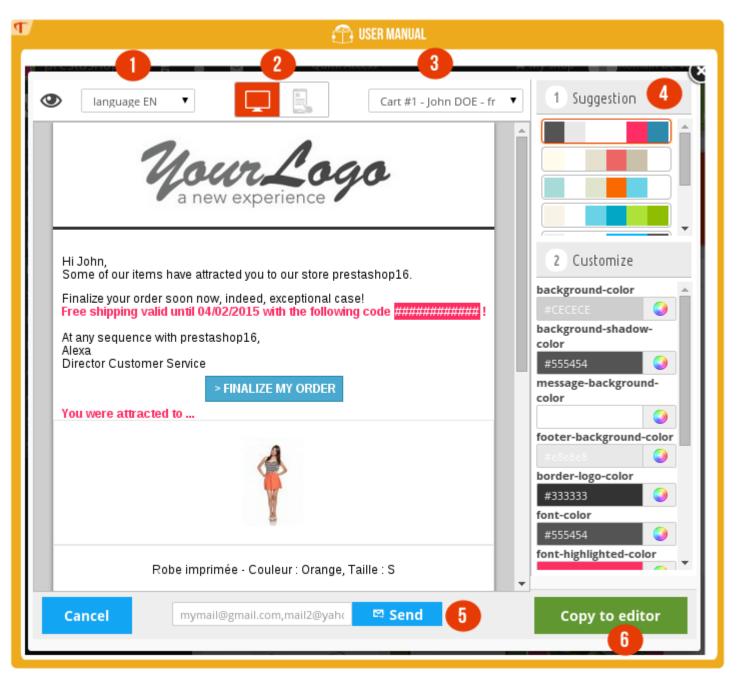

See a preview from an existing cart.

Save the email template

PAGE: 14/59

2 QUICK CUSTOMIZATION FORM

This screen allows you to: customize the email depending on your visual identity, and preview and test the email before sending it.

Language : Select the language.

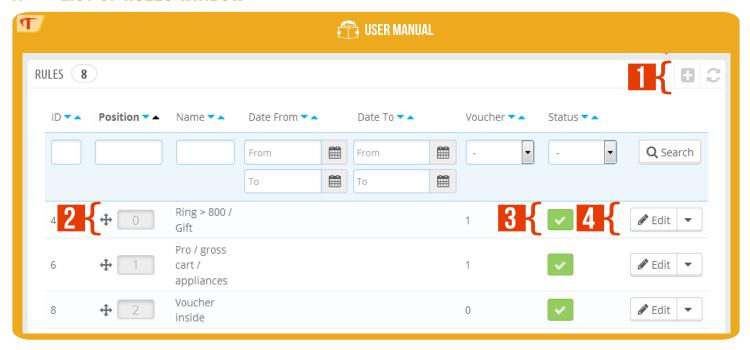

PAGE: 15/59

2	Format : Select the mobile or pc preview mode
3	Cart: The model will be translated according to the selected cart. Carts are currently sorted according to the last change.
3	Suggestion: color palette offered with the example. Select a color palette for you and if you want edit the colors.
4	Colors : Edit colors of each element
5	Email: You can test sending and display directly in your mailbox. To send several emails, each email must be separated by a comma will ",". eg: email1@gmail.com,email2@yahoo.fr;email3@myshop.com
6	Copy to the editor: Copy custom content in the html editor. After this operation you can edit the text.

PAGE: 16/59

3 SETTINGS/RULES

A LIST OF RULES WINDOW

legend Description

- Create a new rule
- Change the priority of a rule by changing its position. The higher its position, the higher its priority.

 "Drag and drop": To change a position, left click and hold the icon, and move it up or down with your mouse.

- Enable or disable a rule's status. If the status is disabled, the rule will no longer apply.

 Information: if you disable a rule, all current cart reminders subject to this rule will be canceled.
- Modify or delete an existing rule.

 Information: If you delete a rule, all current cart reminders subject to this rule will be canceled.

PAGE: 17/59

B EDIT RULE GENERAL SECTION

The edit or create a rule form is divided into several sections. Here is the general section.

- Rule name, for information purposes only. mit must be unique and easily found (for you and your team).
- Enable or disable a rule. If the status is disabled, the i rule will no longer apply.

 Information: If you disable a rule, all current cart reminders subject to this rule will be canceled.

PAGE: 18/59

- Return to the list of existing rules.
- Go to the next section of the form
- 5 Save

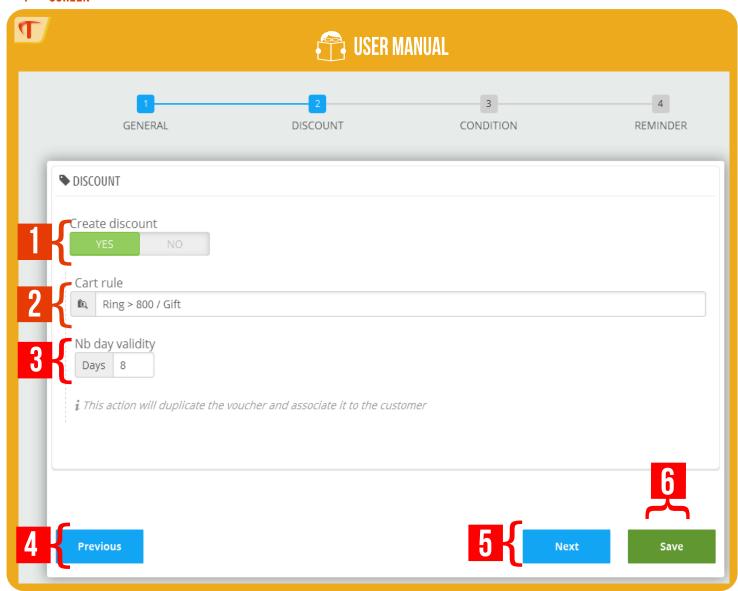

PAGE: 19/59

C EDIT RULE/DISCOUNT SECTION

Use the "discount" section to define a coupon. If a cart is eligible for this rule, a coupon will be created for the first reminder.

The use of a time-limited coupon is a very effective way to ensure orders are completed.

1 SCREEN

If "Yes" the creation of a coupon is enabled for this rule. So as soon as a cart is eligible for this rule, a coupon will be generated.

PAGE: 20/59

- Search an existing cart rule. The selected cart rule will be copied and will be linked to the cart's owner. Information: To search for it, indicate the name or ID of the existing cart rule.
- Coupon shelf-life, in days. This value must be greater than 0, otherwise the coupon will not function for your customers. The start date of the coupon's shelf-life coincides with the date the first reminder is sent. The coupon's expiry date can appear in the email (see the Email section).
- Return to the previous section of the form.
- Go to the next section of the form.
- 6 Save

2 POSSIBLE USES AND PROCESSES

CREATING A COUPON TEMPLATE V

Tab: Price rules → Cart rules

Create a coupon to be used as a template.

Be sure to indicate "1" for the quantity.

CONFIGURING THE RULE

In the Edit Rule, "Discount" section, select the previously created coupon template.

GENERATION OF THE COUPON TEMPLATE

A new coupon will be created as soon as the rule's first reminder is sent.

All information in the coupon template selected in the rule will be transferred to the new coupon.

Only the customer who created the cart can use the new coupon.

The coupon's expiry date will coincide with the number of days you selected in your cart reminder rule.

The discount code will be modified as follows:

"PREFIX_*****"

PREFIX: configurable in the module settings.

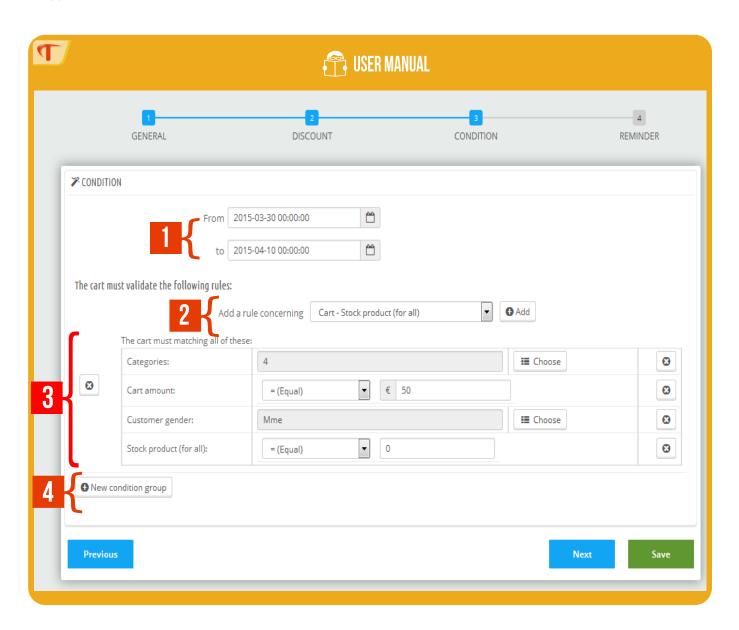

****** : a series of random characters

PAGE: 21/59

D EDIT RULE/CONDITION SECTION

The "condition" section allows you to define the conditions to apply to the rule. If the cart and customer information meets all the conditions you have defined, the rule will be applied (the cart will appear as check-marked).

1 SCREEN

Rule availability period. The rule will can only be applied during this period.

This is a useful setting when promoting items on sale for a limited time only, or during occasions like Christmas, Father's Day, Mother's Day, Valentine's Day, etc.

PAGE : 22/59

- Adds a new condition. Allows you to add a new condition to the group of conditions located below.
- New condition group. You can add multiple groups of conditions to validate the rule. For example:

My rule will apply if: Condition Group 1 OR Condition Group 2 is valid.

In the case below:

The rule will apply if:

The amount of the cart exceeds €90 and contains a product linked to the Women > High > T-shirts category.

OR

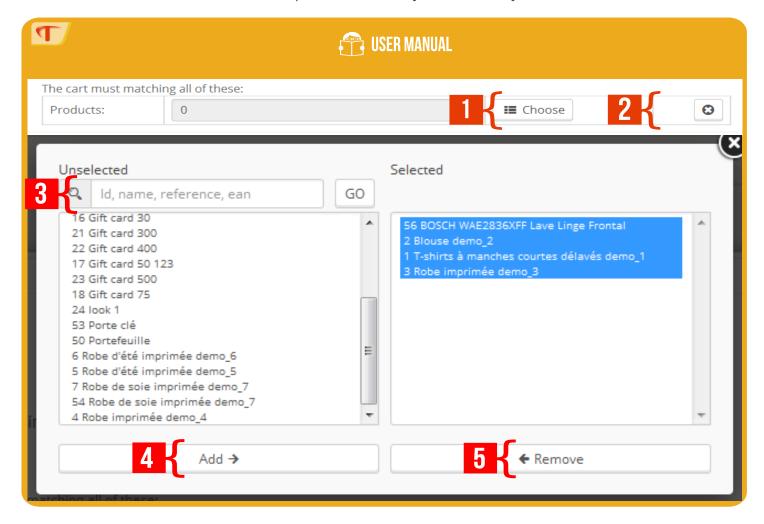

Stock for all items is > 5 and contains a product linked to the Women > High >T-shirts category.

PAGE: 23/59

E THE CONDITIONS

1 CART - PRODUCT

This condition will be valid if the cart contains a product from a list you have already defined.

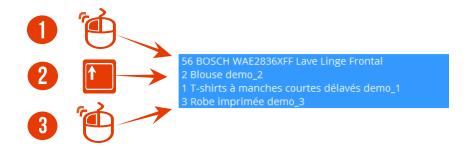

- Open the Choose Product screen.
- Delete the condition.
- Search for a product using its (ID), name , reference or EAN.

PAGE: 24/59

Add a product to the product list.

The list of "selected" products are the products that meet your condition's values. In this example, the cart must contain 56 Bosch WAE2836 or 2 Blouses or 1 T-shirt.

Quick selection: hold down the [Shift] key while clicking on the products that you want to add. (Use the same process to remove.)

Remove one or more products from the list of selected products.

PAGE: 25/59

2 CART — PRODUCT CATEGORY

The condition will be true if the cart contains a product from the categories you have already defined.,

The procedure is the same as that of a "list" condition as explained in the chapter about the "Cart-Product" condition.

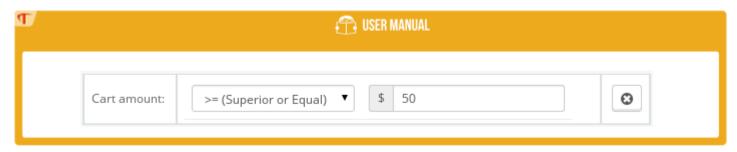

Possible uses:

- → You are currently running a limited-time offer on a product category and you want to remind the customer that they should check-out the cart as soon as possible to take advantage of this offer.
- → You want to offer a product related to this item.
- → You have a wide margin on this type of item and you want to apply a significant discount.

PAGE: 26/59

3 CART — AMOUNT BEFORE TAX

A comparison condition based on the cart's value.

AMOUNT The total value of products before tax, without any discounts.

The value will be calculated in your boutique's default currency.

In this example, the condition will be true if the total value of products exceeds \$50 before tax (the coupons are not applied in the calculation.)

Possible uses:

- → You like to be informed and call the customer when the value of the cart is substantial.
- → You want to offer a coupon with a discount appropriate for the value.

4 CART- PRODUCT STOCK, AT LEAST 1

A comparison condition related to product stock. The condition is true if at least one product validates the comparison.,

In this example, the condition will be true if the cart contains a product with an available inventory greater than 0 and less than 3.

PAGE: 27/59

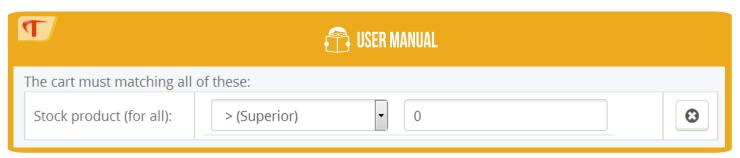

Possible uses:

- → Check if the cart contains items available
- → Inform the customer at the quantity available is limited for products included in the cart.

•••

5 CART-PRODUCT STOCK(ALL)

This is the same as the previous condition, except that the condition must be true for all products in the cart.

In this example, all products in the cart must have an available inventory greater than 0.

6 CUSTOMER — LANGUAGE

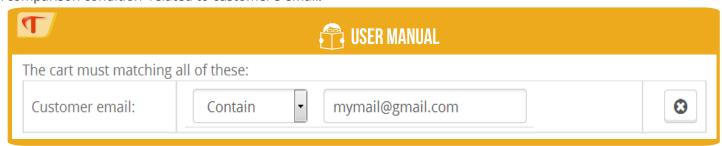

This condition will be true if the customer's language is included in the list of languages you have defined.

In this example, the condition is true when the customer's language is English.

7 CUSTOMER — EMAIL

A comparison condition related to customer's email.

PAGE: 28/59

Possible uses:

- → You want to test a rule only for your customer account.
- → Your store includes orders from different marketplaces whose carts you wish to exclude.

Example: "does not contain" amazon.com, priceminister, cdiscount, etc.

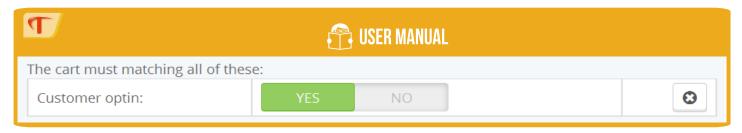

8 CUSTOMER - NEWSLETTER

If the condition is YES and the customer is subscribed to the newsletter, the condition is true.

9 CUSTOMER — ACCEPT OPTIN MAIL

If the condition is YES then the customer accepts optin emails.

PAGE: 29/59

10 CUSTOMER — GENDER

The condition will be true when the customer's gender is included in the list you have defined.

In this example the condition will be true if the customer is a woman.

Possible uses:

- → Send gender-specific emails to female customers.
- → Provide Valentine's Day discounts to men, or provide an extra gift for Father's Day.

...

11 CUSTOMER - COUNTRY

The condition will be True if the customer's country is included in the list of countries you have defined. The rule applies to all of the customer's addresses.

In this example the condition is true when the customer's country is France.

Possible uses:

→ You would like to offer free shipping to specific countries.

PAGE: 30/59

12 CUSTOMER — GROUP

The condition will be true if one of the customer's groups is included in the group list you have defined.

13 CUSTOMER - NUMBER OF ORDERS

A comparison condition related to the number of orders placed by the customer.

In this example, the condition is true if the customer has already placed at least one order.

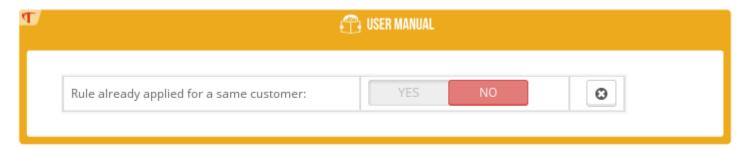

Possible uses:

- → Allows Discounts for loyal customers who place orders regularly.
- → Conversely, if a customer has never placed an order (new customer).

...

14 CUSTOMER — RULE ALREADY APPLIED

In this example, the condition will be true if the customer has never been reminded with this rule

PAGE: 31/59

`

Possible uses:

→ Useful if you do not want to remind the same client in the same way every abandoned cart

...

15 CUSTOMER – AGE

A comparison condition related to the customer age. If the customer has not defined a birthday, the condition will be invalid.

In this example the condition is valid only if the customer's age is between 25 and 35 years.

PAGE: 32/59

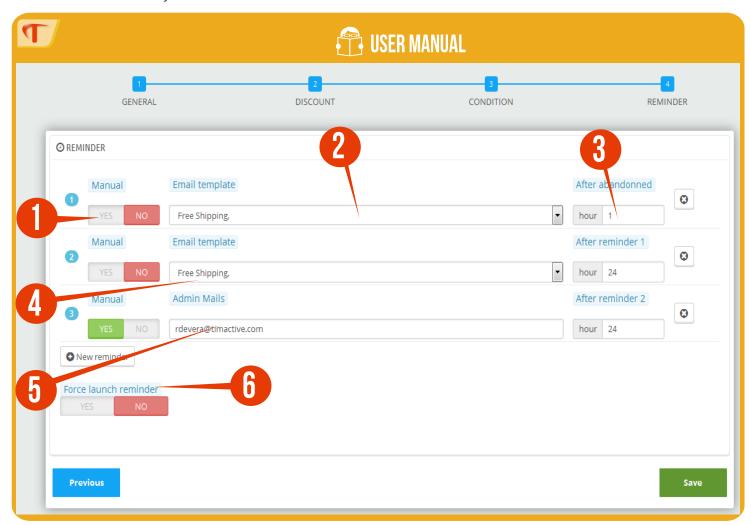

F EDIT RULE REMINDER SECTION

The "reminder" section is used to define your own cart reminders. Reminders are carried once the prescribed time has expired.

There are two kinds of reminders:

Automatic reminder: Your customer will automatically receive an email.

Manual reminder: You'll receive a notification email to alert you to generate a manual reminder. You will then be able to contact the customer directly.

- Kind of reminder to be generated:
 - → Manual
 - → Automatic
- For an automatic reminder, you must select an email template. This email will be sent to the customer.

PAGE: 33/59

The number of hours after which a cart will be considered as abandoned.

Example: In the **configuration settings** (Settings-> configuration) you have defined that the cart is considered abandoned if it hasn't been modified for 10 hours. In this example, reminder number 1 will be generated 11h after the cart's last modification.

- For manual reminders, indicate the email addresses of those employees you wish to receive the notification. Please use the "," as separator character when adding multiple email addresses.

 Example: mail1@gmail.com, mail2@myshop.com, mail3@myshop.com, etc.
- This allows you to create a new reminder. There are no limits on the number of reminders you can send.
- Force reminders: If YES, you can generate the following reminders without checking if the cart still meets the conditions.

Possible uses:

Your customer: Mr. Upjohn, has received reminder number **1**. In the meantime, he has modified his cart and the conditions you had previously defined are no longer applicable.

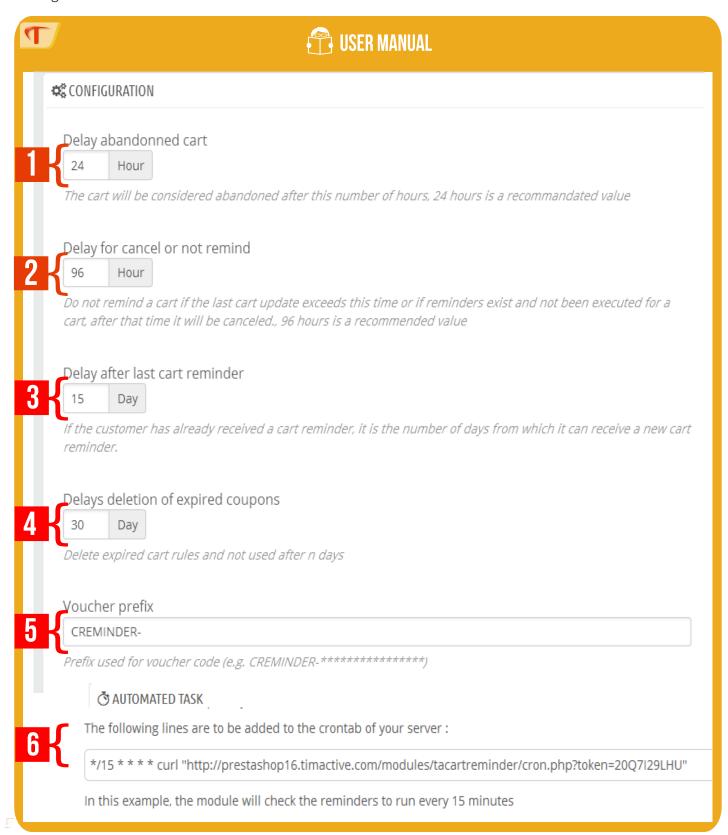

If Force reminder is YES: the customer will receive the next reminders without regard to his cart's contents.

If Force reminder is NO: reminders for this cart are canceled.

PAGE: 34/59

4 SETTINGS/CONFIGURATION

General configuration of the module.

PAGE: 35/59

Hourly time lapse: Once the time lapse is over, the cart is considered as abandoned.

The time lapse is based on the cart's last modification date.

Time lapse after which to not remind or to stop cart reminders.

This time lapse is used in two particular cases:

1st case:

Do not remind a cart if its last update exceeds this time lapse.

For example, if you have specified 96 hours (or 4 days).

Carts modified more than 4 days ago will not be reminded.

This information is important in order not to remind "old carts" upon first installation.

2nd case:

When there are undelivered cart reminders, they will be cancelled after this time lapse.

For example, if you have specified 96 hours (or 4 days).

If the cart is eligible for some reminders that have not yet been sent and it was last modified more than 4 days ago, all reminders will be canceled.

This case can occur if a manual reminder is not indicated as complete and has been this way for several days.

Time lapse after which to send a new cart reminder to the same customer.

A customer has already been reminded on an old cart. After this time lapse, a rule can be applied to a new abandoned cart.

Use case:

PAGE: 36/59

Your customer, Mr. Upjohn, has received a cart reminder with a \$5 discount coupon.

Mr. Upjohn has completed his order. Reminders for this cart were sent and completed.

Three days later, Mr. Upjohn created a new cart that he once again abandons. In this case, the cart will not be reminded because the timeframe is less than 90 days.

Useful: The system will seem less robotic. It's also useful when a cart was created in error.

Time lapse after which to cancel coupons generated by your reminders.

The time lapse begins on the coupon's expiry date.

Useful: This system is useful to keep your database clear of unused coupons.

PAGE: 37/59

5 THE DIFFERENT STEPS OF A REMINDER

A STEP 1— VERIFY CARTS

Verification of applicable carts from all abandoned carts using the predefined reminder rules.

B STEP 2 — "HOOKED" CARTS/ IN PROGRESS

A rule applies to an abandoned cart and it is within the first reminder schedule. The cart appears "hooked".

C STEP 3 — COMPLETED

All completed reminders for a cart or an ordered cart.

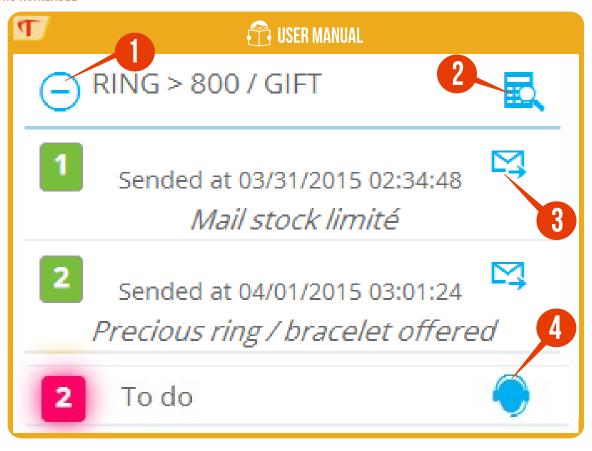

PAGE: 38/59

6 FEATURES GUIDE (CART, TO DO, MANUAL, COMPLETED)

A REMINDERS

1 ACTIONS AVAILABLE

PAGE: 39/59

2 REMINDER STATUSES

2	"Orange": Indicates a reminder in progress, a reminder to be processed or to be completed by an employee.
2	"Green": Indicates that the reminder has been sent.
2	"Grey": Indicates that the reminder is waiting for the previous reminder to be completed before it can be executed.
2	"Pink": Indicates a manual reminder. Contact the customer and mark the reminder as completed.

3 STATUSES & MESSAGES

00:00:10:00	Countdown, in this example the reminder will be generated in 10 minutes.
Waiting for an action	Temporary status, waiting for the (Cron) batch to be processed. The batch is scheduled in the crontab.
Completed	Applies to manual reminders. The reminder is considered as completed (ex:the customer has been contacted by telephone).
Sent	The email was sent to the customer. : Indicates that the customer has opened the email. : Indicates that the customer has clicked the "Complete My Order" link.
Waiting for previous reminder to be completed	The previous reminder must be executed or completed before this one can take effect.

PAGE: 40/59

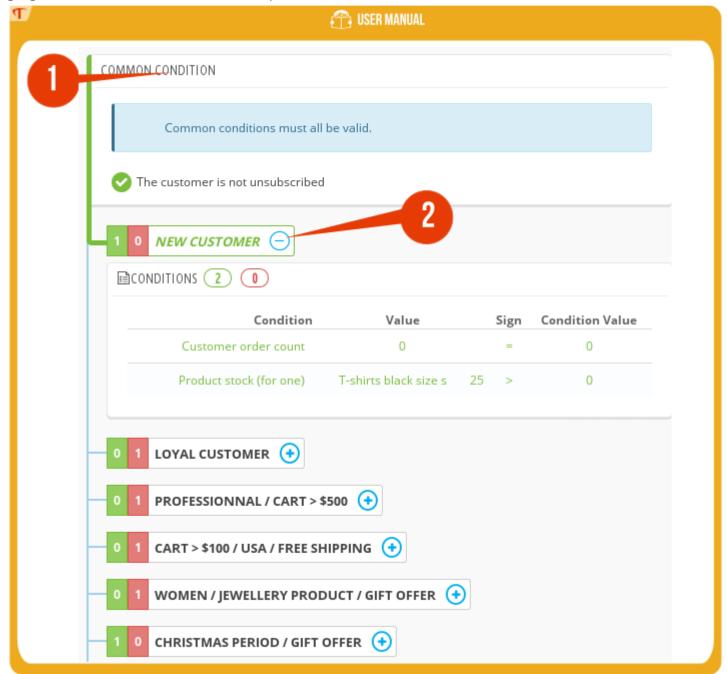

To do

Manual reminder: After having contacted the customer, the reminder should be marked as completed.

PAGE: 41/59

B SELECTED RULE DETAILS

This form provides a more detailed breakdown of the selected rule. If a rule is applicable, a green line will be displayed to highlight the selected rule. A detailed description is also available for each "condition".

Common conditions required in order for a reminder rule to apply. The cart should first be validated by the common conditions.

The customer is not unsubscribed (has not clicked on the "unsubscribe" link).

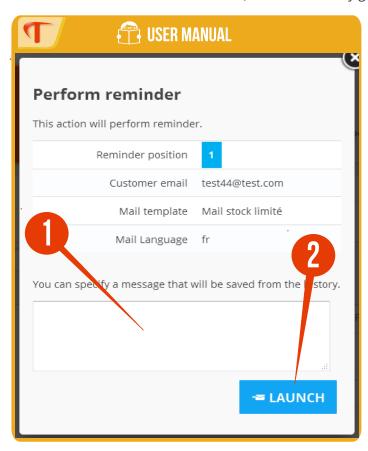

PAGE: 42/59

C GENERATING MANUAL EMAIL REMINDERS

Email reminders are executed automatically, but you can perform this operation by simply clicking the button:

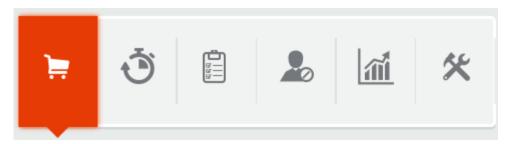

This form is used to immediately generate an email reminder without waiting for the countdown to finish. This form can also be used for to do validation tests. (You can manually generate as many reminders as you wish.)

1	Add an informative message to the cart reminder log. An informal log is created for each cart reminder.
2	Launch the reminder,

PAGE: 43/59

7 CART TAB / CART BEING VERIFIED

A CARTS LISTED

A cart appears in the list if it is:

- Not ordered
- "Not check-marked": The cart has no current or cancelled reminders.
- The cart has been updated within the last n hours (This information is configured in the Settings tab, "Time lapse after which to cancel or not remind").

B HOW A CART IS "HOOKED" OR WILL BE REMINDED.

A cart is "hooked" if:

- 1 One of the defined rules applies.
- 2 Automatic The prescribed time for the first reminder has passed. Example:

OR

2A. The reminder was manually executed by an employee

C INFORMATION: THE CUSTOMER HAS MULTIPLE CARTS

When a customer has multiple carts, only the most-recently updated one will be used for reminders.

PAGE: 44/59

8 REMINDER IN PROGRESS TAB

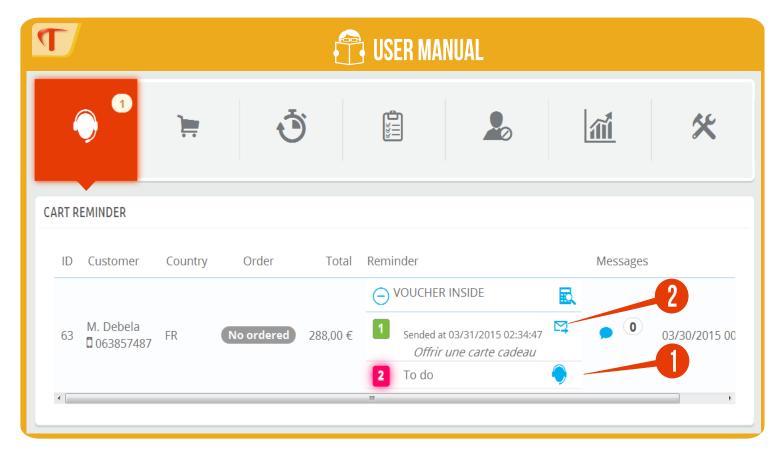

A CARTS LISTED

Carts containing one or more reminders that have not yet been executed .

This page allows you to view and modify current reminders.

9 MANUAL REMINDER TAB

Manual reminders to be executed are shown in a specific tab. When any reminder is to be executed, an email is sent to employees (email configured in the rule).

A HOW TO GENERATE A REMINDER

Click on the icon.

The manual reminder form will appear.

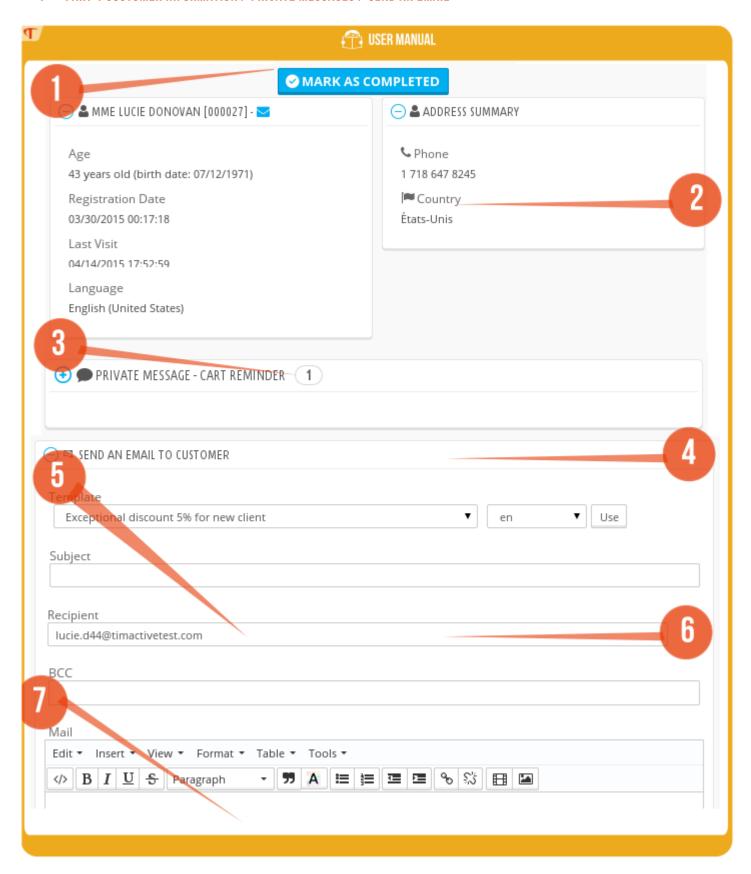

PAGE: 45/59

2	Contact your customer.
3	And click "mark as completed"

B MANUAL REMINDER FORM

PAGE: 46/59

1 PART 1 CUSTOMER INFORMATION / PRIVATE MESSAGES / SEND AN EMAIL

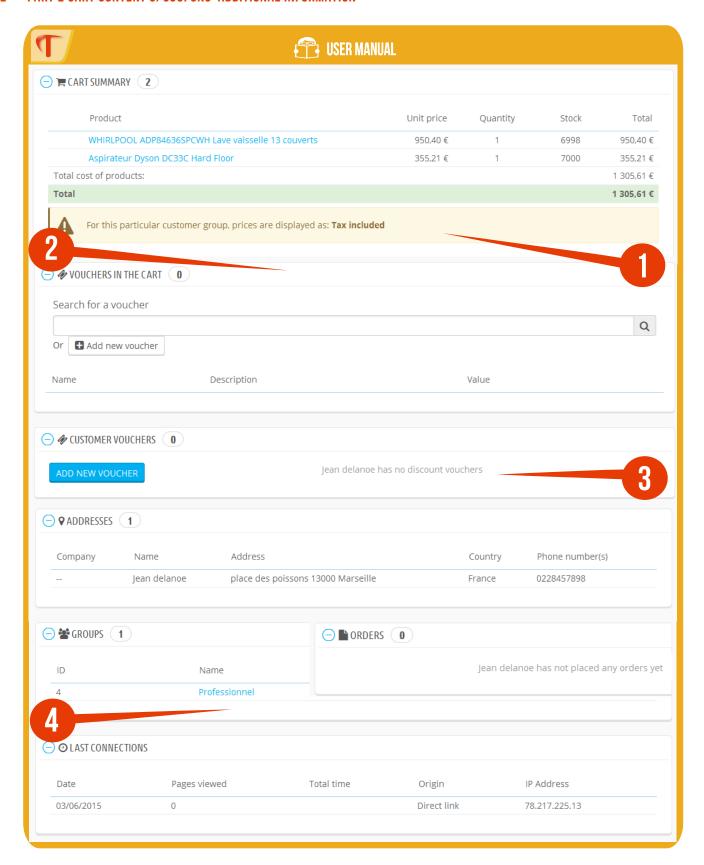

PAGE: 47/59

1	After contacting the customer, marker the reminder as completed. The system will then be informed. If other reminders for the cart exist, they can be executed. Setting a reminder as completed also allows the system to track which reminder and which employee generated the order.
2	Your customer's information. You can contact your customer by phone, for example.
3	Private message: This message is for information purposes only. It allows you to track exchanges with the customer, or to provide information to your employees.
4	"Send an email to the customer": This form allows you to send an email to your customer.
5	Select an email template, the preferred language, and click the "Use" button. The email content will be taken from the template, and the variables will be replaced with information from the customer and the cart. Using a template will enable you to save time when creating emails.
6	Recipient: Enter the email recipients here; normally only the recipient should receive this email. However, you can also use BCC to enter several emails such as email1 @ gmail.com, email2@ gmail.com, etc. These will be hidden from the customer.
7	Content of your email.

PAGE: 48/59

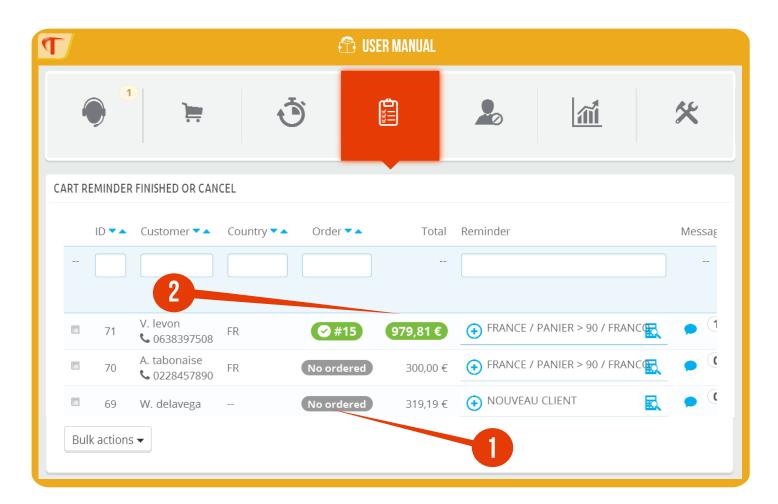

2 PART 2 CART CONTENT S/COUPONS ADDITIONAL INFORMATION

PAGE: 49/59

1	Cart summary: Customer's cart contents
2	Coupons: Allows you to add an existing coupon or create a new coupon (the existing PrestaShop form is displayed).
3	List of customer's current coupons: You can add a new coupon as indicated in the previous rule.
4	Additional information about the customer(s): Addresses, Groups, recent logins and orders placed.

10 COMPLETED TAB

PAGE: 50/59

1	Customer's cart contents
	Coupons: Allows you to add an existing coupon or create a new coupon (the existing PrestaShop form is displayed).

A CARTS LISTED

A cart is present in the list if:

- Cart is purchased
- •All reminders were performed
- •The cart reminder was canceled

B POSSIBLE REASONS TO CANCEL A CART REMINDER.

- **Shelf life:** The cart reminder's shelf life is expired and is no longer valid.
- **The rule no longer applies:** The cart has been updated and the rule no longer applies (The "Force reminders" option is set to "NO" in the rule's settings)
- Rule settings: The rule has been deleted, disabled or one of the reminder rules has been updated.

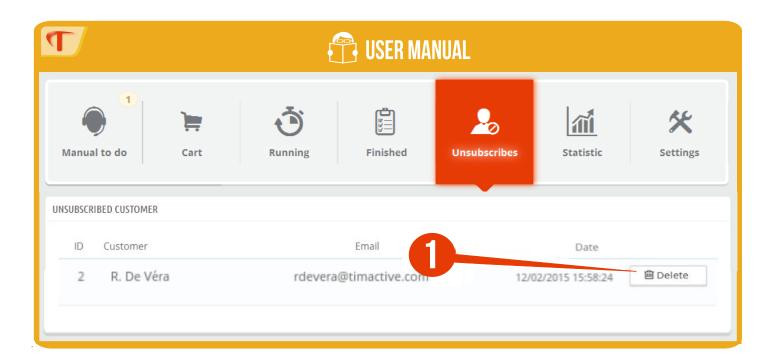

C ORDER LEGEND

No order #cart35	There is no order associated with this cart reminder. (35 is the cart identifier).
⊘ #15	There is an order associated with this cart (15 is the order identifier).
979,81 €	Total including tax.

PAGE: 51/59

11 UNSUBSCRIBED TAB

A list of customers who have clicked the unsubscribed link. Unsubscribed customers will no longer receive cart reminders.

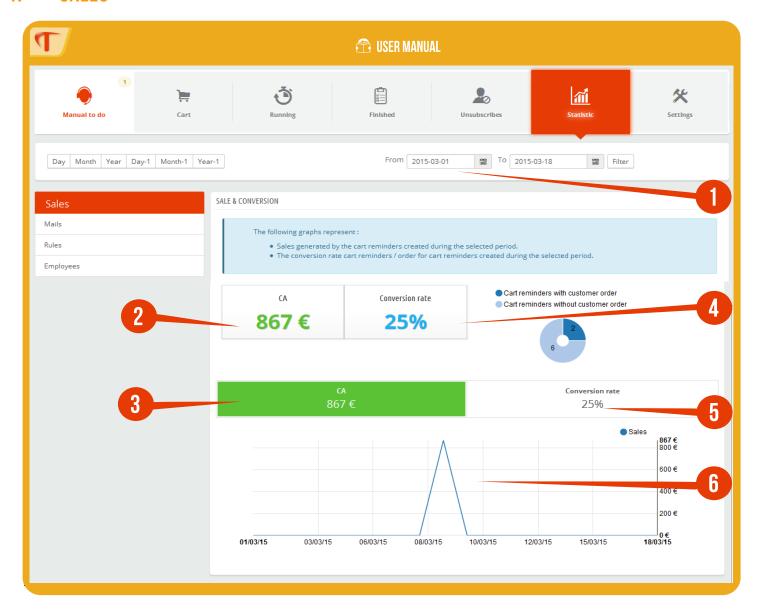

"Delete": After deletion, the customer is able to receive cart reminders again.

PAGE: 52/59

12 STATISTICS TAB

View sales generated, conversion rate, your most effective emails or rules, and your most productive employees.

A SALES

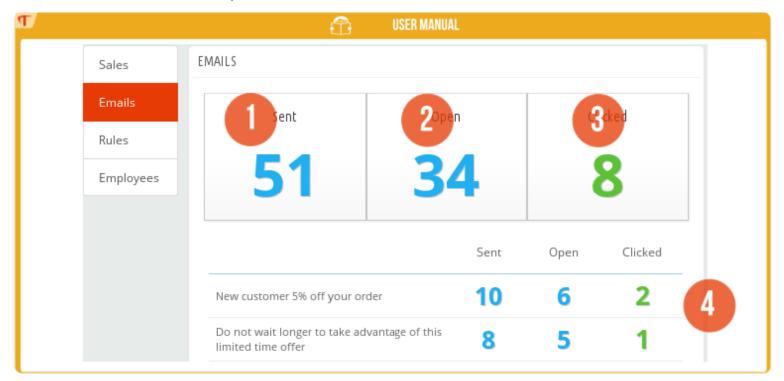

PAGE: 53/59

1	Period selection: Start and end date Quick Selection Mode: Day, Month, Yearthe start date and end date is automatically preselected.
2	Revenues before tax in the default currency. Information: Set on the cart reminder date. Example: If a reminder was executed on 04.15.2015 and the order was placed on 04/16/2015, the revenue amount will be calculated as of 04/15/2015.
3	Select the number to view revenue details.
4	Conversion rate compared to the number of reminded cart / number of order. Information related to the date of the cart reminder.
5	Select the conversion rates to view the conversion rate details.
6	Details of daily revenues generated by cart reminders.

PAGE : 54/59

A EMAILS

Detailed statistics on emails sent, opened and clicked.

1	Number of emails sent during the selected period.
2	Number of emails opened during the selected period.
3	Number of emails clicked during the selected period. The email content must include the {cart_link_start} {cart_link_end} or {cart_link_url} links in order to track the clicks.
4	Detailed view of emails.

PAGE: 55/59

B RULES

Detailed statistics about reminder rules applied to carts

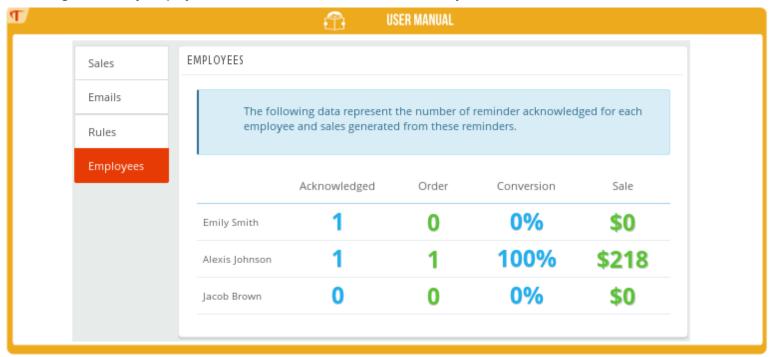

Description of cart reminder rules

Cart: Number of carts reminded
Orders: Number of reminded carts resulting in orders
Conversion: Carts ordered/carts reminded
Sales: Revenue before tax

PAGE: 56/59

C EMPLOYEES

Revenue generated by employees who have contacted customers directly.
